Re: LEC commercialization opportunities

To Whom It May Concern:

This letter is in reference to the law enforcement and corrections applications for the Fog Security System, a tactical fog system for use in the suppression of riot control and unlawful assemblies.

The Fog Security System appears to address the priorities of law enforcement and corrections as identified by the Law Enforcement and Corrections Technology Advisory Council (LECTAC).

Fog Security Inc. President Laurence Gainsborough has attended an OLETC sponsored Commercialization Planning Workshop (CPW) in Greenville, SC, June 25 -29, 2001. The five-day Commercialization Planning Workshop is designed to introduce technology innovators to all elements of the commercialization process. The workshop provides the necessary commercialization information, procedures, tools and understanding to assist technology innovators in logically working through the commercialization process in an organized and programmatic manner.

The Fog Security System has participated in the 2001 Mock Prison Riot and is currently registered to be one of the 85 demonstration technologies at the 2002 OLETC sponsored Mock Prison Riot, May 4 through 8 in Moundsville, WV.

It should be noted that reference to any specific commercial product, process or service by trade name, trade mark or manufacturer, does not imply an endorsement, recommendation or favoring by OLETC.

Sincerely,

F. Wayne Barte
Project Manager
